Hiring Manager

Apple Inc.

Hyderabad, India

Subject: Application for SAP BTP Application Engineer

Dear Hiring Manager,

I am writing to express my interest in the SAP BTP Application Engineer position at Apple. With over 4.4 years of experience in SAP technologies, including extensive hands-on development on the SAP Business Technology Platform using the Cloud Application Programming Model (CAP), I am excited about the opportunity to contribute to Apple's enterprise application ecosystem.

In my current role at Evora IT Solutions, I design and develop cloud-native applications on SAP BTP using CAP and Node.js. My work involves building side-by-side extensions and integrating SAP solutions such as SAP Field Service Management, Business Network Asset Collaboration, Dynamic Forms, and SAP Asset Performance Management through APIs available in the SAP Business Accelerator Hub. I also develop secure OData APIs using Core Data Services (CDS), configure Event Mesh integrations with SAP S/4HANA, and deploy scalable applications on SAP BTP Cloud Foundry.

Previously at Infosys, I developed SAP Fiori and UI5 applications following Fiori design principles and MVC architecture. I implemented Smart Controls, analytical dashboards, and cross-application navigation within SAP Fiori Launchpad to support enterprise business workflows.

My experience also includes implementing OAuth-based authentication mechanisms, managing XSUAA security roles, and integrating SAP applications with external services.

What excites me most about this opportunity is Apple's commitment to innovation and building scalable enterprise systems that support global operations. I am particularly interested in contributing to SAP BTP solutions that leverage CAP, CDS, and modern cloud architecture to enable high-performance business applications.

I would welcome the opportunity to bring my experience in SAP BTP development, integration, and cloud-native architecture to Apple's engineering team. Thank you for your time and consideration, and I look forward to the possibility of discussing this opportunity further.

Sincerely,

Bhargava Sri Sai Krishna Buddana
