PROFESSIONAL SUMMARY

SAP BTP Developer with 4.4 years of experience and strong expertise in SAP Fiori & Cloud Application Programming Model. Experienced in designing scalable enterprise applications, modeling data with Core Data Services (CDS), developing secure OData APIs and deploying solutions in SAP BTP (Cloud Foundry). Proficient in SAP HANA Cloud, SAP Fiori/UI5 front-end development, REST, S/4HANA Public Cloud integration, CI/CD pipelines and XSUAA security implementation. Strong analytical and problem-solving skills with experience across the full application lifecycle.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, Node.js

Frameworks: SAP UI5/Fiori, SAP Cloud Application Programming Model (CAPM)

Developer Tools: Git, VS Code, SAP Business Application Studio (BAS), SAP Web IDE, Postman, SAP API Hub, REST Client

Other Skills: OData, MCP, Cloud Foundry, SAP Build, Business Process Automation, Joule, SQLite, HANA Cloud, SAC

Soft Skills: Effective Communication, Cross-functional Collaboration, Active Listening, Documentation

EXPERIENCE

Software Engineer - Evora IT Solutions (Hyderabad, TS, India)

July 2024 – Present

- Developed side-by-side extensions on SAP BTP using Cloud Application Programming Model (CAP) by consuming APIs from SAP Business Accelerator Hub.
- Built integrations with various SAP solutions such as FSM, BNAC, Dynamic Forms, APM using CAP.
- Configured SAP Event Mesh in SAP S/4HANA and integrated with SAP CAP service.
- Developed scalable backend services using Node.js and Core Data Services (CDS) to expose secure OData APIs for enterprise applications.
- Configured Destinations with OAuth 2.0 authentication flow for secure integration with external services.
- Designed and deployed applications on SAP BTP Cloud Foundry and managed environment configurations.
- Extended Evora Product EvoSuite UI5 applications as per customer needs.
- Trained 10+ colleagues on SAP CAP.

Senior Systems Engineer - Infosys Limited (Hyderabad, TS, India)

Nov 2021 – July 2024

- Developed enterprise grade SAP UI5 freestyle and SAP Fiori Elements applications following Fiori design principles and MVC architecture.
- Implemented Smart Controls like Smart Table (Analytical Table), Smart Chart, and Smart Filter Bar using OData annotations.
- Implemented Deep Insert and OData \$batch operations for efficient CRUD operations.
- Configured cross-application navigation within SAP Fiori Launchpad.
- Developed data visualization dashboards using Fiori overview pages and VizFrame charts to represent business metrics and insights.
- Maintained technical design documentation and collaborated with cross-functional teams to convert business requirements into technical solutions.
- Used Git for version control and collaborative development workflows.
- Implemented custom controls and applied colors to grid table cells using jQuery & CSS.
- Managed tiles and catalogs for custom Fiori apps in Fiori Launchpad.

PROJECTS

FSM Integration and Service Calls Automation (Evora IT Internal)

- Developed a side-by-side extension for SAP Field Service Management (FSM) on SAP BTP using CAP by consuming REST APIs from SAP Business Accelerator Hub.
- Designed an SAP Fiori/UI5 application allowing users to upload Excel file and perform bulk service call creation in SAP FSM via REST APIs.
- Implemented secure authentication and multi-company access management by generating multiple Client IDs/Secrets, allowing users to access company specific data based on XSUAA role collections.

Dynamic Forms CAP Extension

- Implemented a side-by-side extension for SAP Dynamic Forms by consuming APIs to retrieve form data packaged as ZIP file and extracted content for further consumption by SAP Analytics Cloud (SAC).
- Configured Destinations at the SAP BTP Subaccount level and consumed them within CAP services, established secure connectivity between SAP CAP (XSUAA service) and SAP Datasphere using OAuth 2.0 for data consumption.
- Optimized SAC integration by configuring API timeout handling, reducing frequent SAC timeout errors and improving data retrieval reliability and developed stories in SAC to support business reporting and visualization requirements.

Business Network Asset Collaboration (BNAC) CAP Extension

- Developed a side-by-side extension for SAP Business Network Asset Collaboration (BNAC) on SAP BTP using CAP by consuming REST APIs from SAP Business Accelerator Hub.
- Designed Fiori applications to onboard contractors, dispatch work orders to technicians.
- Designed CAP service to handle confirmation of work orders by adding documents from MDK offline application and pushing data to SAP BNAC.

Fiori/UI5 App Design

- Developed an end-to-end SAP UI5 freestyle, Fiori Elements application for tracking and managing financial information using OData services and extended standard Fiori apps as per customer needs.
- Implemented interactive dashboards and analytical tables to provide real-time financial insights.

Personal Projects

- Side-by-side extension for SAP Document AI extraction service on SAP BTP using CAP ([GitHub](#)).
- CAP using XSUAA and standalone application router ([GitHub](#))
- CAP using XSUAA and managed application router ([GitHub](#))

EDUCATION

JNTUK University College of Engineering

Bachelor of Technology – Electrical & Electronics Engineering, CGPA: 7.9

Vizianagaram (Andhra Pradesh)

July 2018 - July 2021

Sri Mullapudi Venkataraya Memorial Polytechnic

Diploma in Electrical & Electronics Engineering, Percentage: 95

Tanuku (Andhra Pradesh)

June 2015 - April 2018

CERTIFICATIONS / ACHIEVEMENTS

1. SAP Certified Associate - SAP Fiori Application Developer
2. SAP Certified Associate - Backend Developer - SAP Cloud Application Programming Model

BLOGS

1. Enabling PDF Download in SAP CAP-Based Fiori Applications
2. Extending Fiori Overview Page Applications and Linking Global Filters to Custom Cards
